## "A day in the life of a shed"

Our workshop shed gets to see plenty of activities and hear a load of stories, so let's look at what happened on 01 Aug.

Some finer work with electrics

The 966 FL is in for some brake repairs

Hacking up some steel for a project

Bailey bridge jack restoration

Pre-installation maintenance on a new guillotine

A new fangled chime perhaps, you'll have to wait and see....

### The AAMME Service Wagon (below & right)

With an older mixed fleet its important that we have a practically fitted out service truck. The electrics have been worked on to include easy access to 12 & 24 volt service outlets to jump starting sleepy machines.

Also included is re-installation of a hydrovane air compressor

**STOP PRESS:** Congratulations to the couple who were married in the chapel on great sunny August day.
