"A couple on the go"

Well...Ahh... what is it!

Looking at the two pictures on the left, and the one picture on the right; you can see this project is comprehensive and is requiring a ground up approach.

So what might it be?

There was a hint in the last newsletter - No 52.

We'll keep our eye on this little one; moving on!

(No it's not a typo!)

(left & above picture) Again, we exposed you to this project in the last newsletter. As you can see there is a little bit more on the front and you can now see the other end as well. Anyway, more on this one as it progresses!

What do you do when a fire truck gets too hot?

You repair or replace the heat exchanger. Here's Paul again; there is always something to work on when you have a mature fleet. *(Wal, you were lucky – this time!)*

STOP PRESS

BENEATH HILL 60

Do yourselves a favour and check out this fabulous flick.

A real insight to the tunnellers and the silent war that was conducted underground. *(Go see it!)*
