“Check this out”

Royal Australian Engineers in Vietnam “1965 ~ 1972”

Diorama constructed by Sappers J. Martin and B. Retski.
Frame constructed by Sapper McMahan from Trade Troop.

This scene recreation has to be seen to appreciate the detail that the Sappers have captured. The diorama was built while Sapper Martin and Retski were undertaking their Combat Engineering Course. The work that has gone into this is nothing short of sensational – great work.

To our young Sappers; thanks again, and all the best for the future.

“Preservation of our heritage”
